Experience

Flutter Developer *Mindsclik, Vadodara*

May 2024 – Present

- Developed and maintained production-grade Flutter mobile applications used by over **10,000+ active users**, ensuring high performance, scalability, and smooth UI interactions.
- Implemented structured state management using **Provider**, integrated RESTful APIs, and handled secure data flow between frontend and backend services.
- Designed responsive UI components supporting multiple screen sizes, optimized app startup time, and reduced UI rendering issues across Android devices.

Freelance Flutter Developer *Remote*

July 2023 – April 2024

- Built complete mobile applications from scratch for service-based and utility-based clients following clean architecture and modular project structure.
- Integrated **Firebase Authentication**, **Firestore database**, **push notifications**, and third-party REST APIs for real-time data synchronization.
- Collaborated directly with clients to gather requirements, deliver iterative improvements, and deploy production-ready Android applications.

Software Development Intern — AI & Python *Kintu Designs*

Dec 2022 – Jun 2023

- Developed an AI-powered chatbot using **Dialogflow** to analyze user conversations and identify stress-related behavioral patterns.
- Implemented Python-based facial expression and behavioral analysis models using OpenCV and machine learning techniques.
- Performed model testing, experimentation, and evaluation using Google Colab, improving accuracy through dataset tuning.

Projects

LinguaVision AI — Language Learning Mobile Application *Flutter, Firebase, REST APIs, ML Kit*

- Built an AI-powered language learning application that detects real-world objects using camera input and provides contextual vocabulary learning.
- Implemented ML Kit image recognition with pronunciation guides, usage examples, and interactive word explanations.
- Developed personalized flashcards, progress tracking, and conversational practice modules to enhance user engagement.

Knorr-Bremse Industrial Mobile Application *Flutter, Provider, REST APIs, Firebase*

- Contributed to an enterprise-level Flutter application used internally by industrial teams across multiple locations.
- Developed dashboards, inspection workflows, dynamic forms, and operational modules based on real-world industrial processes.
- Collaborated with senior developers to implement secure API communication and maintain scalable application architecture.

Live Video Streaming Mobile Application *Flutter, Firebase, Agora SDK*

- Developed a real-time video streaming application enabling low-latency audio and video communication.
- Integrated Agora SDK for live broadcasting, channel management, and real-time user synchronization.
- Implemented Firebase authentication, cloud storage, and user session handling for secure access control.

Education

Bachelor of Technology — Computer Science and Technology Charusat University

2023

GPA: 8.7

Diploma — Computer Engineering Sigma Institute of Technology

2020

GPA: 8.3

Skills

Programming Languages: Dart, Python, Java, C, C++, HTML, CSS

Frameworks & Technologies: Flutter, Firebase, REST APIs, Provider, Agora SDK

AI / ML: ML Kit, HuggingFace, Dialogflow

Developer Tools: Git, GitHub, Android Studio, VS Code, Postman, Figma
