Experience

Flutter Developer - Mindsclik, Vadodara (May 2024 - Present)

- Developed production-grade Flutter apps for 10,000+ active users.
- Implemented structured state management using Provider and RESTful APIs.
- Optimized app startup time and UI rendering across devices.

Freelance Flutter Developer - Remote (July 2023 - April 2024)

- Built complete mobile applications following clean architecture.
- Integrated Firebase Auth, Firestore, Push Notifications, and APIs.
- Collaborated with clients for iterative improvements and deployment.

Software Development Intern - AI & Python - Kintu Designs (Dec 2022 - Jun 2023)

- Developed AI-powered chatbot using Dialogflow for behavioral analysis.
- Implemented facial expression models using Python and OpenCV.
- Improved model accuracy through dataset tuning on Google Colab.

Projects

LinguaVision AI - Language Learning Mobile App

- AI-powered app detecting real-world objects for vocabulary learning.
- Implemented ML Kit image recognition and interactive flashcards.

Knorr-Bremse Industrial Mobile Application

- Enterprise Flutter app for industrial inspection workflows.
- Developed dynamic forms, dashboards, and secure API modules.

Live Video Streaming Mobile Application

- Real-time streaming app using Agora SDK with low latency.
- Integrated live broadcasting, channel management, and Firebase.

Education

B.Tech - Computer Science and Technology - Charusat University (2023) | GPA: 8.7

Diploma - Computer Engineering - Sigma Institute of Technology (2020) | GPA: 8.3

Skills

Languages: Dart, Python, Java, C, C++, HTML, CSS

Frameworks: Flutter, Firebase, REST APIs, Provider, Agora SDK

AI/ML: ML Kit, HuggingFace, Dialogflow

Tools: Git, GitHub, Android Studio, VS Code, Postman, Figma
